ACADEMY

DURATION **3 DAYS** MODE : ONLINE/F2F

Bridging Talent to

Quality Engineering, AI & Cybersecurity

ISTQB Certified Tester

Strengthen your software testing knowledge and skill with

Foundation Level Syllabus v4.0 (CTFL)

Gain a strong understanding of software testing principles and practices, while improving your career prospects by obtaining globally-recognised certification.

Topics Coverage over three days course duration

Chapter 1 : Fundamentals of Testing

- What is Testing
- Why is Testing Necessary?
- Testing Principles
- Test Activities, Testware and Test Roles
- Essential Skills and Good Practices in Testing

Chapter 2 : Testing Throughout the Software Development Lifecycle

- Testing in the Context of Software Development Lifecycle
- Test Levels and Test Types
- Maintenance Testing

Chapter 3 : Static Testing

- Static Testing Basics
- Feedback and Review Process

Chapter 4 : Test Analysis and Design

- Test Techniques Overview
- Black-box Test Techniques
- White-box Test Techniques
- Experience-based Test Techniques
- Collaboration-based Test Approaches

Chapter 5 : Managing the Test Activities

- Test Planning
- Risk Management
- Test Monitoring, Test Control and Test Completion
- Configuration Management
- Risks and Testing
- Defect Management

Chapter 6 : Tool Support for Testing

- Tool Support for Testing
- Benefits and Risks of Test Automation
