Course Outline

Business Outcomes

1

Strategic Test Management & Planning

Manage testing with established processes, define project test strategies, and plan all test activities, including resources and effort.

2

Contextual Risk & Stakeholder Engagement

Identify stakeholders and lifecycles, organize risk assessments to guide testing, and present the business case for testing.

3

Diligent Monitoring, Control & Reporting

Continuously monitor and control testing, report progress to stakeholders, and manage defect workflows effectively.

4

Team Development & Process Enhancement

Develop test team skills and lead test process improvement initiatives within projects and the organization.
